Full Stack Developer

Full-Stack Developer with 2+ years of hands-on experience in architecting scalable web applications and cross-platform mobile solutions using React.js, Next.js, Node.js, and React Native. Proven track record of engineering multi-tenant SaaS platforms, enterprise ERP systems, and e-commerce solutions with PostgreSQL and MongoDB. Specialized in advanced state management (Redux Toolkit/Saga), building secure RESTful APIs, and translating complex Figma designs into responsive, production-ready systems.

Core Competencies

Programming Languages HTML5, CSS3, JavaScript (ES6+), Node.JS, TypeScript
Frameworks React.js, Next.js, React Native, Express.js, Tailwind CSS, Bootstrap
State Management Redux Toolkit, Redux Saga, Context API
API & Data RESTful API Integration, PostgreSQL, MongoDB, Axios, JSON, SQL
Tools & Version Control Git, GitHub, GitLab, VS Code
Other Skills Responsive Web Design, Cross-Browser Compatibility, Performance Optimization

EXPERIENCE

Metaviz, Pakistan **Jul 2026 - Present**
Full Stack Developer (Full-Time), Lahore

- **Full-Stack Web Architecture:** Architecting and maintaining high-performance, full-stack web applications using **Next.js**, **React.js**, and **Node.js/Express**, leveraging server-side rendering (SSR) and static site generation (SSG) for optimal load times and SEO.
- **E-Commerce & Platform Customization:** Customizing enterprise e-commerce solutions on **BigCommerce**, engineering custom storefront workflows, widgets, and integrating headless storefronts with backend APIs.
- **Scalable Backend & RESTful APIs:** Designing robust server-side microservices and RESTful API endpoints using **Node.js** and **Express.js**, enforcing secure authentication, rate-limiting, and middleware optimization.
- **Dual Database Management:** Modeling and optimizing database schemas using **MongoDB** for document-driven dynamic data and **PostgreSQL** for relational transactional integrity, complex joins, and analytical reporting.
- **End-to-End System Performance:** Enhancing overall application performance by fine-tuning database queries, managing asynchronous workloads, and ensuring seamless cross-system data synchronization between BigCommerce and internal database systems.

mCode Technology, Pakistan **Jul 2026 - Present**
Front End & Mobile Developer (Part-time), Lahore

- **Cross-Platform Mobile Apps:** Engineered and optimized high-performance mobile application workflows using **React Native**, ensuring smooth cross-platform compatibility and native device feature integration.
- **Food Delivery & ERP Ecosystem:** Developed key customer-facing and delivery modules for the **MEG Ecosystem**, utilizing **React.js** and **React Native** for real-time order tracking and updates.
- **Mobile State & Data Flow:** Handled complex state and asynchronous operations across web and mobile layouts using **Redux Toolkit** and **Redux Saga**.
- **API Synchronization:** Connected secure RESTful APIs via **Axios** to keep real-time synchronization between the web ERP and React Native mobile clients.

mCode Technology, Pakistan **Jan 2026 - Jul 2026**
Front End Developer (Full-Time), Lahore

- **Project Execution:** Spearheaded the front-end development of Pizza Online Management (ERP) and the MEG (Food Delivery & ERP) ecosystem, engineering scalable web interfaces using React.js and high-performance cross-platform mobile applications with React Native.
- **State Management:** Implemented advanced, robust state management architectures by leveraging Redux Toolkit for efficient predictable data flow and Redux Saga for complex asynchronous side-effects.
- **UI/UX Optimization:** Crafted enterprise-grade, pixel-perfect user interfaces and responsive layouts using Reactstrap and Bootstrap, integrating complex form controls and strict schema validation via Formik and Yup.

- **API & Data Integration:** Architected secure and optimized data communication pipelines using Axios for seamless RESTful API consumption and real-time synchronization between web dashboards and mobile clients.

Senew Tech, Pakistan **Jun 2025 - Nov 2025**
Front End Developer, Lahore

- **Advanced React Development:** Developed and maintained dynamic, large-scale web applications using **React.js** and **Tailwind CSS**.
- **Live Project Impact:** Contributed to multiple **live production projects**, ensuring high performance, clean code, and pixel-perfect UI/UX.
- **Professional Forms:** Built interactive and secure forms with complex validation logic using **Formik** and **Yup**
- **API Integration:** Handled seamless data communication between frontend and backend using **Axios** for RESTful API consumption.
- **State Management:** Expertly managed complex application states and asynchronous workflows using **Redux Toolkit** and **Redux Saga**.

StacksMind (Pvt) Ltd., Pakistan **Jun 2024 - Nov 2024**
Front End Developer Internship , Lahore

- **UI/UX Development:** Built 10+ responsive and high-fidelity web pages using **HTML5, CSS3, JavaScript, and Bootstrap**, ensuring a seamless user experience across all devices.
- **Design-to-Code Conversion:** Mastered the art of converting complex **Figma and PSD designs** into **pixel-perfect**, clean, and semantic code, significantly improving UI consistency.
- **Responsive Architecture:** Leveraged **Tailwind CSS** and Bootstrap grid systems to create mobile-first layouts, ensuring 100% responsiveness.

EDUCATION

The Islamia University of Bahawalpur, Bahawalpur, Pakistan, Bachelor of Science in Software Engineering, (GPA: 3.43), Mar 2022 - Jan 2026

GC University Lahore, Lahore, Pakistan, Intermediate in Computer Science, (GPA: 80%), Sep 2019 - Sep 2021

PROJECTS

Multi-Tenant Construction Management SaaS (Web + Offline Mobile)

- Architected a multi-tenant SaaS backend with **Node.js**, **Express**, **TypeScript**, **PostgreSQL** and **Prisma ORM**, isolating each company's data with **Row-Level Security**.
- Built core modules for projects, procurement and stock, labour payroll, site cash and client billing, documented with **Swagger/OpenAPI**.
- Developed a **Next.js** web app with **Redux Toolkit**, and an offline-first **React Native (Expo)** mobile app with encrypted **SQLite** and background sync.

Multi-Tenant SaaS E-Commerce Platform **Present**

- Architected an enterprise-grade RESTful API backend using **Node.js**, **Express**, **PostgreSQL**, and **Prisma ORM**, implementing tenant resolution middleware for isolated storefronts and custom domains.
- Designed and executed critical business logic including coupon validation algorithms, per-user usage limits, transactional order processing, merchant dashboard analytics, and Cloudinary media uploads.
- Enforced robust security and reliability with **JWT** authentication, password resets with **Nodemailer**, strict **Zod** validation pipelines, and comprehensive API documentation using **Swagger UI**.

Programming Bridge – Software & AI Agency Platform

- Engineered the official web presence for a software solutions agency offering web, mobile, and AI development services, utilizing **Next.js**, **TypeScript**, and **Tailwind CSS**.
- Designed modular, reusable UI components, dark/light theme support, and seamless lead-generation pipelines for enterprise client inquiries.
- Built and integrated RESTful endpoints with **Node.js/Express**, ensuring fast data retrieval, secure inquiry handling, and optimized asset delivery.

Multi-Brand Enterprise ERP Ecosystem (Ongoing)

- Developing a scalable, multi-brand ERP system deployed across major chains like **MEG Burger** and **Pizza Online**. Responsible for engineering the web dashboard using **React.js** and the mobile application using **React Native**. Leveraged **Redux Toolkit/Saga** for complex state management, **Axios** for API integration, and **Formik/Yup** to optimize multi-tenant order and inventory workflows.
